

CommONEnergy

Sustainable Building Challenge: *a competition for shopping centres*

- ✓ to award European best practices on retrofitted shopping centres
- ✓ to provide examples useful for future renovations
- ✓ to improve the sustainability of retail buildings

The competition in a nutshell

The CommONEnergy SBChallenge will award the two most sustainable and energy efficient buildings as **Best Sustainable Shopping Centres**. The competition is addressed to recently renovated shopping centres, assessed with a recognised sustainability protocol. The competition is articulated in two categories:

- ✓ Iper: buildings with a gross area > 5.000 m²
- ✓ Super: buildings with a gross area between 500 m² and 5.000 m²

Interested participants shall fill in the Project Datasheet, which includes basic information on the building and the CommONEnergy Performance Card (6 KPIs), and submit a Sustainability Assessment Report.

The CommONEnergy SBChallenge technical commission will support participants in preparing the requested information.

The SBChallenge Jury will evaluate the Project Datasheets and Assessment Reports provided for each shopping center, identify the Top 10, and will award a winner for each of the two categories.

All shortlisted projects will be presented during CommONEnergy's Final Conference, September 7, 2017 in Brussels. The two winners will be presented at the high-level event WSBE17 Hong Kong, 5-7 June 2017. A publication presenting the best cases will also be prepared and disseminated in Europe to showcase good practices.

Key deadlines

- ✓ Launch event of the competition: 23 June 2016 @ CESB16
- ✓ Submission of Project Datasheets and Assessment Reports: 30 April 2017
- ✓ Notification of winners per category: 31 May 2017
- ✓ WSBE17 Hong Kong presentation: June 2017
- ✓ Final conference and Award ceremony: 7 September 2017

Why participate?

The selection of a shopping centre in the CommONEnergy SBChallenge competition and subsequent presentation or award at the final event can bring many benefits, including:

the opportunity to reach a wide public, becoming a best practice in Europe through wide dissemination in journals, publications, national and local conferences;

the opportunity to learn about sustainable retrofitted shopping centres in Europe;

the opportunity to compare the performance of your shopping centre with other best practices in comparable formats, and vice versa.

Download the full rules and the Project Datasheet on the **CommONEnergy SBC website**
